

BVAR vs. Information Criteria: A Monte Carlo Simulation Study

Akın Aydın* Ferdinand Loser†

May 25, 2026

Abstract

This is the abstract for your paper. Briefly state the purpose of the research, the principal results, and major conclusions. The abstract should be self-contained and citation-free.

Keywords: Keyword 1, Keyword 2, Keyword 3

JEL Codes: C15, C32

1 Introduction

This is the introduction. You can easily cite your references from your Zotero Better BibLaTeX file using standard Natbib commands like **citation_key** for textual citations or (**citation_key**) for parenthetical citations.

2 Methodology

Describe your structural VAR (SVAR) models and the Monte Carlo Data Generating Processes (DGPs) here.

2.1 Data Generating Process

Explain the true DGP based on Johansen and Juselius (1990), Ramey (2011), or Kilian and Murphy (2014).

3 Simulation Results

Present the results of your Monte Carlo simulations.

4 Conclusion

Summarize the main findings and implications for applied macroeconomic research.
